

NÁVOD

Garlist SDG-03 Zahradní domek - Šedá

S0810A -2228M

Doporučené nástroje

DŮLEŽITÉ: Uschovejte pro budoucí použití. Pečlivě si přečtěte.

PŘÍPRAVA K MONTÁŽI

Před zahájením stavby zkontrolujte místní stavební předpisy týkající se základů, umístění a dalších požadavků. Prostudujte si tento návod – obsahuje důležité informace a užitečné tipy, které usnadní a zpříjemní montáž.

Instrukce k montáži:

Před zahájením si přečtěte všechny pokyny a informace. Pro úspěšný výsledek se ujistěte, že postupujete krok za krokem podle uvedené posloupnosti.

Základ / podlaha:

Pozemek musí být připraven tak, aby základna domku byla vodorovná ze všech stran – nutná je kontrola pomocí vodováhy.

Základ může být vyroben z impregnovaného dřeva nebo betonu, aby se zabránilo pronikání vlhkosti do domku.

Domek nesmí být postaven přímo na trávu, protože zem během deště měkne a bahní. Pokud se dělá betonová deska, musí být mírně vyspádovaná k okrajům, aby se zabránilo pronikání vody. Beton musí být zcela suchý, než na něj domek postavíte.

Základna může být také vytvořena z cihel, tvárnic, nebo umístěna na betonovou desku. Cihly nebo tvárnice musí být pevně usazeny do roviny a konstrukce domku na ně následně přišroubována.

Díly a seznam dílů:

Před zahájením montáže roztříděte a zkontrolujte všechny díly a spojovací materiál, abyste měli jistotu, že nic nechybí (viz strana Seznam dílů).

Nepokoušejte se domek sestavit, pokud nějaké díly chybí.

Částečně sestavený domek může být snadno poškozen i slabým větrem.

Bezpečnost musí být na prvním místě:

Vyberte si pro montáž suchý a bezvětřný den. Na montáž jsou potřeba alespoň dvě osoby. Používejte ochranné rukavice, brýle a dlouhé rukávy, abyste předešli zranění ostrými hranami dílů.

Děti a domácí zvířata nemají na staveništi co dělat.

Nestoupejte celou vahou na střechu domku. Pokud používáte schůdky, ujistěte se, že jsou bezpečné.

Údržba a péče:

Udržujte domek čistý – používejte měkký hadřík, v případě potřeby vodu.

Udržujte dveřní kolejnice čisté, bez nečistot, aby dveře mohly hladce jezdit.

Odstraňujte sníh vhodnými nástroji, aby byl vstup bezpečný. Těžký sníh může způsobit zřícení střechy – vždy dbejte na bezpečnost.

Domek není určen k bydlení, ale pouze ke skladování věcí.

CZ – UPOZORNĚNÍ:

Pokud jsou rohy lehce ohnuté, je to v pořádku.

Noste rukavice a lehce narovnejte rohy,
dokud nebudou rovné.

Poté budou panely zase v normálním stavu
a nebude to mít žádný vliv na montáž.
